## Stieglmeyer appearance in Dubai

27. October 2017 // **Trade Fairs & Events**

Arab Health is the largest convention of medical and healthcare experts in the Middle East and North Africa. In 2018, this trade fair will be held for the 43rd time.

### **Arab Health is the largest convention of medical and healthcare experts in the Middle East and North Africa**

**Arab Health is the largest convention of medical and healthcare experts in the Middle East and North Africa. In 2018, this trade fair will be held for the 43rd time. From 29 January to 1 February 2018, numerous exhibitors will be presenting their innovative products and services for everyday medical use.**

The trade fair has developed more and more strongly in recent years and by 2017 has already attracted more than 4,000 exhibitors to the 23 halls and more than 96,000 visitors. In addition to the actual trade fair itself, a congress with numerous conferences is held every year.

Stieglmeyer has been exhibiting at Arab Health for several years now and will present a new concept from 2018 onwards. We have teamed up with Atlas Medical for this purpose and are presenting 4 high-quality hospital beds at the stand of our trading partner. As a manufacturer, we can advise interested parties directly about our products and at the same time establish contact with a local dealer,"says export manager Dorian Klusmann.

Our dealers and their interested customers can also look forward to a wonderful Stieglmeyer evening with a mixture of product presentation, magic and delicious food.
