Assist - spare parts warehouse and delivery

02. October 2015 // **Products & Services**

The long supply of spare parts from Stiegmeyer beds

Assist is particularly proud to have been supplying customers with spare parts for a long time: the service division of the Stiegmeyer-Group repairs beds for 15 years and beyond. Currently, over 7,000 storage spots are occupied in the Herford spare parts warehouse. We explain how the right parts reach the customer.

Plenty of space for spare parts: The storage area in the Assist service centre, which opened in 2014, has been doubled to about 1,500 m². Spare parts which are needed often, the so-called "fast movers", are stored near the ground; the parts which are requested less often, are stored on shelves up to 6 metres high.
