Beds & furniture for successful rehabilitation

26. October 2017 // **Products & Services**

In order to successfully rehabilitate people after a disease or accident, many stages of treatment must be seamlessly integrated. In medicine, up to six phases are differentiated: from acute treatment in intensive care units to the subsequent intensive care phase and the return to everyday professional and social life.

Stiegmeyer promotes recovery and recuperation with individual products

In order to successfully rehabilitate people after a disease or accident, many stages of treatment must be seamlessly integrated. In medicine, up to six phases are differentiated: from acute treatment in intensive care units to the subsequent intensive care phase and the return to everyday professional and social life. Stiegmeyer supports patients and caregivers at all times with tailor-made products. Get informed about all the possibilities at MEDICA or read our new Reha catalogue at www.stiegmeyer.com.

Our hospital bed Puro promotes recuperation and helps patients to be able sit up on their own again and take their first steps. Its split Multiflex+ safety sides offer a lot of protection while still leaving enough room for unobstructed entry and exit from the bed. The safety sides' mobilisation aid provide additionally for a secure hold.

The Elvido reha is a care bed for the special requirements of rehabilitation. With its 4-section mattress base and a wide range of height adjustment, it adapts precisely to the needs of the patient and allows for back-friendly, comfortable care work. At the same time, the absence of safety sides is ideal for mobilising the patient. Decors, head and footboards in a cosy, home-like design create a positive atmosphere.

The suite eMotion comfort bed impresses patients, guests and staff in first-class rehabilitation areas and hotel rooms. The mattress surface can be moved to a comfortable armchair position by remote control. Due to its height-adjustability, the bed is also suitable for physiotherapeutic tasks. The visual appearance of the eMotion suite can be adapted to the finest tastes with three lines of design.

If patients in rehabilitation are able to move more independently, the comfortable Carino bed is a good choice. With its manually adjustable backrest, it offers comfortable positions to read or watch TV. The Carino is also excellently suited for nurses' residences due to its individual design possibilities.

With our wide range of high-quality products, we can completely furnish many rooms in your rehabilitation facility. Upon request, our specialists can also work to your room dimensions with accuracy down to the millimetre. Contract furniture from our wood production facility in Nordhausen will turn the residents' rooms,

dining rooms, common rooms and duty rooms into exactly those which you have imagined. Our experts will advise you extensively on site and plan 3D models of your rooms on computers, from which every detail can be determined and checked in advance. Stieglmeyer produces all furniture itself and also takes care of precise assembly. This way, you can enjoy the highest quality from a single source. Get information about our contract furniture at MEDICA or find out more at www.stieglmeyer.com.
